SIEMENS

OpenAir[™] Air damper actuators

GBB...1 GIB...1

Rotary version, AC 24 V / AC 230 V

Electronic motor driven actuators for three-position and modulating control, nominal torque 25 Nm (GBB) or 35 Nm (GIB), self-centering shaft adapter, mechanically adjustable span between 0...90°, pre-wired with 0.9 m long connection cables.

Type-specific variations with adjustable offset and span for the positioning signal, position indicator, feedback potentiometer and adjustable auxiliary switches for supplementary functions.

Remarks

This data sheet provides a brief overview of these actuators. Please refer to the Technical Basics in document Z4626en for a detailed description as well as information on safety, engineering notes, mounting and commissioning.

Use

- For damper areas up to 4 m² (GBB) or 6 m² (GIB), friction-dependent
- Suitable for modulating controllers (DC 0...10 V) or three-position controllers (e.g. for outside air dampers).

• For dampers having two actuators on the same damper shaft (tandem-mounted actuators or powerpack).

Type summary

GBB/GIB	131.1E	135.1E	136.1E	331.1E	335.1E	336.1E	161.1E	163.1E	164.1E	166.1E
Control type	Three-position control					Modulating control				
Operating voltage AC 24 V	x	x	х				х	x	х	x
Operating voltage AC 230 V				х	х	х				
Positioning signal Y DC 010 V DC 035 V with characteristic							x	x	x	x
function Uo, ∆U Position indicator U = DC 010 V							х	x	x	x
Feedback potentiometer 1 k Ω		х			х					
Auxiliary switches (two)		х	х		х	х			х	х
Rotary direction switch							х	х	х	х
Powerpack (two actuators, tandem-mounted)	x	х	х	х	х	х	х	x	x	x

Functions

Туре	GBB.31 / GIB.31	GBB/GIB161			
Control type	Three-position control	Modulating control			
Positioning signal with adjustable characteristic function		DC 035 V at Offset Uo = 05 V and Span ΔU = 230 V			
Rotary direction	Clockwise or counter- the type of control. With no power applied, the actuator remains in the respective posi- tion.	clockwise direction depends the setting of the rotary direction switch clockwise / counter-clockwise			
Position indication: Mechanical	Rotary angle position indication by using a position indicator.				
Position indication: Electrical	The feedback potentiometer can be connected to external voltage to indicate the position.	Position indicator: Output voltage U = DC 010 V is generated propor- tional to the rotary angle. U depends on the rotary direction of the switch setting.			
Auxiliary switch	The switching points for auxiliary switches A and B can be set independent of each other in increments of 5° within 0° to 90°.				
Powerpack	Mounting two of the same actuator types on the same damper shaft results in a double torque (with accessories ASK73.1).	Mounting two of the same actuator types on the same damper shaft results in a double torque (with accessories ASK73.2).			
Rotary angle limitation	The rotary angle of the shaft adapter can be limited mechanically at increments of 5°.				

Ordering

Note	Potentiometer cannot be added in the field . For this reason, order the type that in- cludes the required options.
Delivery	Individual parts such as position indicator and other mounting materials for the actuator are not mounted on delivery.

Accessories to functionally extend the actuators are available, e.g., rotary/linear sets, auxiliary switches (1 or 2 switches) and weather protection cover; see data sheet **N4699**.

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
